Description

Dynamic Movement Screening Learning Program

This program provides you with a comprehensive package of functional movement screening and corrective exercise programs. They follow a structured sequence for use with a wide variety of clients. This is a great addition to the Pro Trainer Software or the Running Gait Analysis Program. Functional movement screening, injury prevention and a functional guide to observing and assessing functional movement are included in the program. Additional information on Gait Analysis is included as part of the training manual.

Included in the DVD:

Functional Movement Screening

- Functional Movement Screening and Capture protocols
- Functional Movement Screening Assessment form
- Injury and Prevention overview
- Dynamic Movement Screening manual, including guidelines for movements to observe and quantify as part of the process
- Movements, along with basic instruction for capture and observation are included
- Free email and phone support for one (1) year
