Description

Reflective Marker Kits provide accurate tracking for Gait Analysis

Accurate measurement of joint and limb positions is critical for Gait Analysis. It can be difficult, however, to identify and accurately draw the various points and angles for video motion analysis.

- Reflective Marker Kits provide the components to help you better visualize body movement
- Allows for easy joint center identification on screen during video replay and analysis
- Properly placed individual markers allow for quick and objective measurement of joint angles
- Better visualization of body segment rotations

- Reusable spherical markers; double-sided adhesive stickers and clear tape included in Kit
- Kit contains:
 - 25- 14mm (3/4") highly reflective spherical markers
 - 1080 double-sided adhesive stickers

Reflective Markers for Motion Analysis

- 1 roll of flexible, clear tap
- Marker Placement Guide – recommended placement of reflective markers
